SUMMARY

Full-Stack Developer | Ruby on Rails | Founder, Yielded Circle Tech | Hackathon Winner

Full-Stack Developer with 2+ years of hands-on Ruby on Rails experience, building secure, data-driven platforms for startups and NGOs. As founder of Yielded Circle Tech, I take products from idea to launch, turning Figma designs into live apps, including marketplaces, an ebook platform and a food bank system serving 1,000+ users in Uganda. I use AI tools like Claude, Cursor, ChatGPT and Gemini every day to move faster and spend more time on real problem-solving. I care about clean code, reliable systems and close teamwork.

SKILLS

Front-End: JavaScript, React, Redux, Tailwind CSS, Vite, HTML5, CSS3
Back-End: Ruby on Rails, PostgreSQL, RESTful APIs
Tools & Methods: Git, GitHub, Render, Figma, RSpec, TDD, Agile/Scrum, Responsive Design
AI Tools: Claude, ChatGPT, Cursor, Gemini
Professional: Technical Leadership, Code Reviews, Sprint Planning, Client Management, Remote Pair-Programming, Mentoring

EXPERIENCE

Founder & Lead Software Engineer — Lagos, Nigeria
Yielded Circle Tech — March, 2026 – Present

- Run a software development agency that builds MVPs, custom platforms and marketplace apps for African founders and NGOs.
- Lead projects end to end: scoping, contracts, milestone planning, development, deployment and maintenance.
- Delivered BookPound, a multivendor marketplace, working directly with the founder and team.
- Managed a contracted developer on a B2B marketplace build, running sprint planning and code reviews to keep delivery on track.

Backend Developer & CTO (Part-Time) — Remote
Itan Technologies – Lagos, Nigeria — Feb, 2025 – Aug, 2026

- Led a small team of developers and designers to take a Nigerian ebook platform from idea to MVP in under 6 months, running sprint planning and code reviews.
- Turned Figma designs into a live, user-friendly reading experience.
- Built the Ruby on Rails backend with secure API endpoints, authentication and optimized database queries so content loads faster for readers.

Software Development Team Lead — Remote
Tech To The Rescue – Warsaw, Poland — Aug, 2024 – Mar, 2025

- Won the Zero Hunger Hackathon by leading a team of 3 to build a food access solution for Haba Na Haba Food Bank, securing **AWS budget approval** for further development.
- Built a USSD app with Ruby on Rails, improving food access for 1,000+ users in Uganda.
- Built a donor portal for the food bank from Figma designs, helping staff manage donors and donations.
- Ran the team with agile practices, sprint planning, code reviews and pair programming.

Frontend Developer Intern

Jasper – Remote (London, UK) Mar, 2024 – May, 2024

- Built responsive web pages with React, Redux and Tailwind CSS in a team of 3.
- Tested and optimized pages for cross-browser and cross-device use, improving speed and accessibility.

Tech Content Creator

YouTube, TikTok & Instagram Oct, 2022 – Present

- Created 10+ beginner-friendly tutorials on web development, explaining React and Ruby on Rails in simple terms.
- Helped 100+ Microverse students complete their React capstone projects with step-by-step guidance.
- Creating short tutorials teaching Nigerian business owners how to use AI to grow their business.

EDUCATION

MICROVERSE Mar, 2023 – Jan, 2024

Remote Full Stack Web Development Program, Full Time

- Completed 1,300+ hours of algorithms, data structures and full-stack development with Ruby, Rails, JavaScript, React and Redux.
- Pair-programmed with international developers using GitHub and Gitflow, with daily standups.
